QUOTED. Sept. 14, 2018. Mir Imran.

by

Prominent medtech inventor and entrepreneur Mir Imran is laser-focused on robotic pill technologies. Check out what Imran said about a "smart" pill being developed by Rani Therapeutics that can deliver biologics orally.

"Biologic drugs are protein-based drugs like insulin and adalimumab (Humira) to treat chronic diseases. Currently, patients have to inject themselves, as these drugs are not available to be taken orally. Achieving oral delivery of biologics is considered the holy grail of drug delivery."
–Mir Imran, CEO, Rani Therapeutics LLC
