QUOTED. Feb. 13, 2019. Pavan Choudary.

by

India is now allowing medical device companies to submit their instructions for use (IFU) in electronic format. See what Pavan Choudary from the Medical Technology Association of India said about it here.

“Many products cannot be supplied with paper IFU as the product is transferred to the loaner kit in the supply chain and sterilized before being supplied to the doctor. The acceptance of eIFU will remove such issues.” –Pavan Choudary, chairman and director general, Medical Technology Association of India
