## QUOTED. April 11, 2019. Mike Lobinsky.

by

EOS imaging, which develops imaging devices for orthopedics, is commercializing its new web-based 3D surgical planning software for total hip arthroplasty in the US. See what EOS's CEO Mike Lobinsky said about it [here](#).

"We can virtually simulate all of that online and using the patient-specific EOS images and 3D model, which we believe no one else can do based on low dose X-ray." –Mike Lobinsky, CEO, EOS imaging
