QUOTED. April 18, 2019. Cameron Piron.

by

At this year's annual American Association of Neurological Surgeons (AANS) conference, medical device makers demoed high-tech digital solutions for neurosurgeons. See what Synaptive Medical's president, Cameron Piron, said about its surgical planning software.

"Tractography is the ability to image the water movement in the brain, and we have advanced algorithms that take those data sets from standard magnets and are able to look at the connections and represent them in three-dimensional structures." –Cameron Piron, president, Synaptive Medical
