## QUOTED. April 23, 2019. Sen. Roy Blunt.

by

US legislators accuse the Chinese government of recruiting and subsidizing US NIH-funded Chinese researchers to steal US-owned genetic research and intellectual property, cheating the peer review system, and establishing US-connected lab facilities with access to US citizens' genomic data. See what US Senator Roy Blunt said about it here.

“Not everyone is well-intentioned, and we know from an ongoing FBI investigation that the Chinese government is trying to undermine the US research infrastructure.” –Sen. Roy Blunt, chair, Senate Appropriations Committee, Labor and HHS Subcommittee
