QUOTED. 10 July 2019. Michael Friedrich.

by

Switzerland-based robotics company Distalmotion hopes to win marketing approval in Europe for Dexter, a robotic surgery system designed to help surgeons with long and complex surgical tasks. See what Distalmotion's CEO Michael Friedrich said about it here.

"Robotics is useful in dissection and suturing parts which are complex, which require dexterity and take a long time ... But robotics is not the right tool when doing specialized tasks." – Michael Friedrich, CEO, Distalmotion
