QUOTED. 11 December 2019. Tejas Patel.

by

Corindus Vascular Robotics Inc. expects its CorPath GRX robotic intervention system will eventually be part of a widespread system of "telerobotic" intervention sites operated by specialists located far away. See what Tejas Patel, an interventional cardiologist at the Apex Heart Institute in Ahmedabad, India, said about it here.

"If utilized effectively, [remote percutaneous coronary intervention] could potentially be employed to provide standard-of-care treatment to many patients with [coronary artery disease] who live in remote areas or underdeveloped countries who would otherwise not receive treatment." – Tejas Patel, interventional cardiologist, Apex Heart Institute
