QUOTED. 25 February 2020. David Maman.

by

Israel-based Binah.ai hopes to earn regulatory approval for a video-based monitoring app that can detect vital signs in minutes. See what Binah.ai's co-founder and CEO, David Maman, said about the technology here.

“Two years from now, our goal is that just by using your smartphone everyone will have 20 different vital signs measured within two minutes. The entire way of doing health observation and health monitoring will change.” – David Maman, CEO, Binah.ai
