QUOTED. 18 March 2020. Julian Goldman.

by

US health systems are canceling elective surgeries in response to COVID-19 to preserve critical resources. See what Julian Goldman, anesthesiologist and director of the Medical Device Interoperability and Cybersecurity program at Massachusetts General Hospital, had to say about the potential ramifications.

“I think with ‘all hands on deck’ addressing a public health issue is more of an opportunity to resolve things quickly. I am very optimistic about deploying new technology capabilities in collaboration with manufacturers and the FDA.” – Julian Goldman, anesthesiologist and director of the Medical Device Interoperability and Cybersecurity program, Massachusetts General Hospital
