## QUOTED. 17 February 2021. Geoff Martha.

by

According to a new report by Meddevicetracker, the global insulin pump market is expected to reach \$5.1bn in 2024, a CAGR of 10.4%. Several insulin pump makers are expected to launch new products this year. See what Medtronic's CEO, Geoff Martha, said about it here.

"The 780G in particular, has had a tremendous customer response in Europe, which bodes well for when we bring the technology to the US market." – Geoff Martha, CEO, Medtronic
