QUOTED. Elchanan Bruckheimer.

by

Israeli-based start-up RealView Imaging received US FDA 510(k) clearance for its Hologscope-i holographic system used prior to and during interventional procedures. See what Elchanan Bruckheimer, medical director of RealView Imaging, said about it here.

“Having a real hologram of the heart in my hand, based on preoperative computed tomography and intra-procedure ultrasound, allows me to focus in and fully understand the complexities of the patient's 3D anatomy.” – Elchanan Bruckheimer, medical director, RealView Imaging
